PROFESSIONAL SUMMARY

Full-stack software engineer who independently designs, builds, and deploys production systems across web, mobile, and AI. Has taken seven projects from first commit to live deployment — including a multi-tenant real estate marketplace, an insurance-automation SaaS platform, two Android apps, and a full RAG pipeline — handling database design, backend, frontend, and infrastructure end to end.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Frontend: Next.js 15, React, Tailwind CSS, Framer Motion, React Native, Expo SDK 54
Backend: Node.js, Express, FastAPI, PostgreSQL, Supabase, Redis, REST APIs
AI / ML: LangChain, pgvector, Gemini Embeddings, Groq (Llama 3.3 70B), RAG pipelines
Mobile: React Native, Expo SDK 54, EAS Build, expo-av, expo-media-library, AsyncStorage
Tools & Infra: Git/GitHub, Docker, Vercel, Railway, Firebase, GitHub Actions, Puppeteer

EXPERIENCE

Independent Software Engineer — Freelance / BITROOT

Gaborone, Botswana · 2023 – Present

- Design, build, and ship full-stack web and mobile products end-to-end — from database schema and API design through frontend and deployment — for personal ventures and client engagements.
- Built a production Retrieval-Augmented Generation (RAG) pipeline in Python: scraping, chunking, Gemini embeddings, pgvector similarity search, and grounded responses via Llama 3.3 70B on Groq, with a FastAPI backend on Railway and React frontend on Vercel.
- Designed multi-tenant PostgreSQL schemas with row-level security, role-based access control, and audit logging for two SaaS platforms — an insurance-workflow automation tool and a real estate marketplace.
- Built two Android apps with React Native, Expo SDK 54, and EAS Build, covering offline-first media playback, persistent state management, and custom UI/animation work.
- Delivered a commercial marketing site for Paragon Insurance Brokers, a licensed NBFIRA broker, including WhatsApp quote-request integration and a multi-page responsive build.
- Own full client relationships end to end: requirements gathering, technical specification, deployment, and ongoing maintenance.

KEY PROJECTS

Askragify — Python, FastAPI, React, Railway, Vercel

- End-to-end RAG pipeline: scrape any URL → chunk → embed with Gemini → pgvector similarity search → grounded answers via Llama 3.3 70B (Groq).
- Multi-turn conversation history with inline source citations.

Keyat — keyat.vercel.app · Real Estate Marketplace

- Multi-tenant property marketplace for buyers, sellers, and agents with role-based access control, advanced search/filtering, and live listing updates.
- Agent analytics dashboard, secure authentication, encrypted data, and payment-ready architecture.

PolicyBridge — policybridge.vercel.app · Insurance Automation SaaS

- Enterprise SaaS automating policy workflows, renewal tracking, and compliance logging for insurance brokers — with automated PDF generation, multi-tenant broker management, an audit trail, and a client portal dashboard.

BlackDice — Android · Offline Music Player

- Offline-first music player scanning device storage via expo-media-library; vinyl-themed UI with spinning animation, EQ visualizer, persistent mini-player, and queue management.

Yonder — Android · Audiobook Player

- Streams LibriVox public-domain audiobooks with chapter navigation and persistent progress tracking, 0.5x–2x speed control, sleep timer, and timestamped bookmarks.

Paragon Insurance Brokers — paragoninsurancebrokers.co.bw · Client Marketing Site

- Marketing site for a licensed NBFIRA broker with WhatsApp quote-request integration, scroll-triggered animations, and a multi-page responsive build.

EDUCATION

BSc (Hons) Software Engineering with Multimedia

Limkokwing University of Creative Technology, Gaborone, Botswana · 2019 – 2024 · Graduated November 2024
