

SHAUN CHIKEREMA

Full-Stack Software Engineer

Gaborone, Botswana · shaunchikerema28@gmail.com · +267 76 051 623

shaun-chikerema.vercel.app · github.com/shaunChikerema · linkedin.com/in/shaunchikerema

PROFESSIONAL SUMMARY

Full-stack software engineer with three years of experience designing, building, and deploying production systems across web, mobile, and AI. Combines hands-on product development for a live insurance brokerage — including a multi-tenant SaaS platform now used by multiple agencies — with independent delivery of seven end-to-end projects: a real estate marketplace, two Android apps, and a Retrieval-Augmented Generation (RAG) pipeline. Comfortable owning database design, backend, frontend, and infrastructure, and collaborating directly with business stakeholders to turn operational requirements into shipped software.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: Next.js 15, React, Tailwind CSS, Framer Motion, React Native, Expo SDK 54

Backend: Node.js, Express, FastAPI, PostgreSQL, Supabase, Redis, REST APIs

AI / ML: LangChain, pgvector, Gemini Embeddings, Groq (Llama 3.3 70B), RAG pipelines

Mobile: React Native, Expo SDK 54, EAS Build, expo-av, expo-media-library, AsyncStorage

Tools & Infrastructure: Git/GitHub, Docker, Vercel, Railway, Firebase, GitHub Actions, Puppeteer

PROFESSIONAL EXPERIENCE

Software Developer — Alfa First Projects (Licensed NBFIRA Insurance Agency)

2024 – 2025

Gaborone, Botswana

- Designed and built PolicyBridge, a multi-tenant insurance-automation SaaS platform, to replace the agency's manual policy workflows — now adopted by Alfa First and additional insurance brokerages.
- Implemented automated policy document generation, renewal tracking, audit-trail logging, and a client portal dashboard using Next.js, PostgreSQL, Node.js, and Puppeteer.
- Built and launched the agency's public marketing site, including an NBFIRA-licensed hero section, service breakdowns, and a WhatsApp quote-request flow.
- Worked directly with agency leadership and staff throughout the build — gathering requirements, running feedback sessions, and iterating the product to fit real day-to-day brokerage operations.

Independent Software Engineer — Freelance / BITROOT

2023 – Present

Gaborone, Botswana (Remote)

- Design, build, and ship full-stack web and mobile products end-to-end — from database schema and API design through frontend and deployment — for personal ventures and client engagements.
- Built a production Retrieval-Augmented Generation (RAG) pipeline in Python: scraping, chunking, Gemini embeddings, pgvector similarity search, and grounded responses via Llama 3.3 70B on Groq, with a FastAPI backend on Railway and React frontend on Vercel.
- Designed a multi-tenant PostgreSQL schema with row-level security and role-based access control for a real estate marketplace serving buyers, sellers, and agents.
- Built two Android apps with React Native, Expo SDK 54, and EAS Build, covering offline-first media playback, persistent state management, and custom UI/animation work.
- Delivered a commercial marketing site for Paragon Insurance Brokers, a licensed NBFIRA broker, including WhatsApp quote-request integration and a multi-page responsive build.

KEY PROJECTS

PolicyBridge — [policybridge.vercel.app](#) · Insurance Automation SaaS

- Built for Alfa First Projects and extended to additional insurance brokerages; automates policy workflows, renewal tracking, and compliance logging with a multi-tenant broker-management model and audit trail.

Keyat — *keyat.vercel.app · Real Estate Marketplace*

- Multi-tenant property marketplace for buyers, sellers, and agents with role-based access control, advanced search/filtering, and live listing updates.

Askragify — *Python, FastAPI, React, Railway, Vercel*

- End-to-end RAG pipeline: scrape any URL → chunk → embed with Gemini → pgvector similarity search → grounded answers via Llama 3.3 70B (Groq), with multi-turn conversation history and inline source citations.

BlackDice — *Android · Offline Music Player*

- Offline-first music player scanning device storage via expo-media-library; vinyl-themed UI, EQ visualizer, persistent mini-player, and queue management.

Yonder — *Android · Audiobook Player*

- Streams LibriVox public-domain audiobooks with chapter navigation, persistent progress tracking, variable playback speed, sleep timer, and timestamped bookmarks.

Paragon Insurance Brokers — *paragoninsurancebrokers.co.bw · Client Marketing Site*

- Marketing site for a licensed NBFIRA broker with WhatsApp quote-request integration, scroll-triggered animations, and a multi-page responsive build.

EDUCATION

BSc (Hons) Software Engineering with Multimedia

Limkokwing University of Creative Technology, Gaborone, Botswana · 2019 – 2024 · Graduated November 2024
